Задания для предтекстового этапа могут быть выполнены в формате mind-map прямо в процессе просмотра встроенного видео с YouTube

Для критериальной оценки понимания текста
можно создать mind-map с критериями

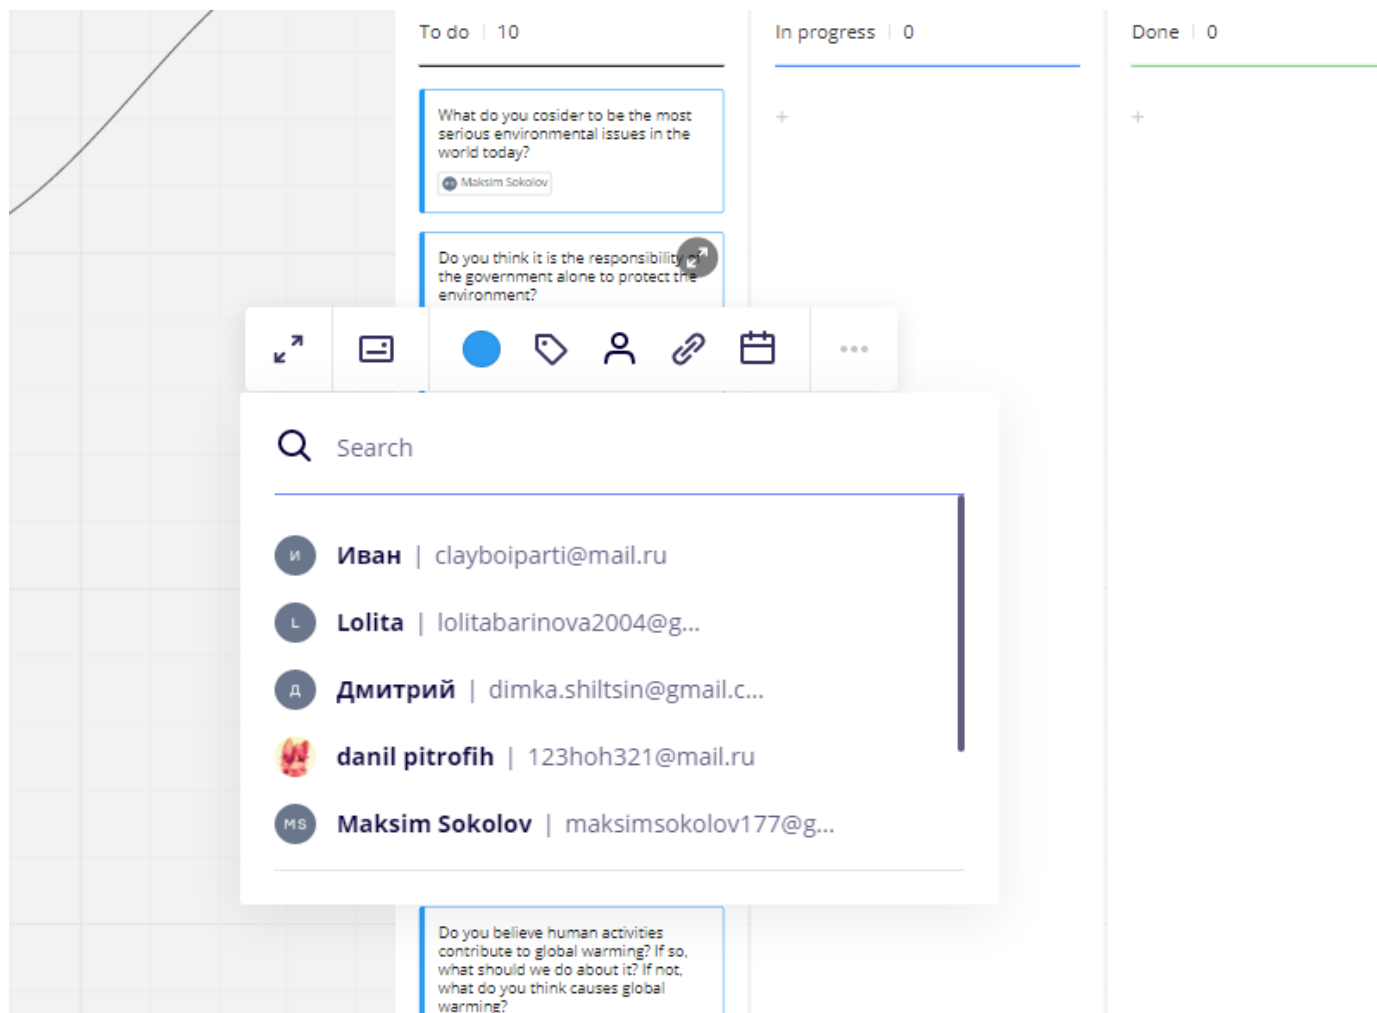

Sokolov M.	Green
Shiltsin D.	Yellow
Ksusha S.	Orange

Обучающиеся заполняют таблицу самооценки, согласно mind-map – прописывают во второй столбик цвет, которым выделен уровень их компетентности

Do you think it is the responsibility of the government alone to protect the environment? Дмитрий Шильцин

What measures can individuals take to protect the environment? Lolita

I consider air pollution to be the most serious environmental problem in the world. The inhabitants of megalopolises are especially concerned about the problem of air pollution. Huge volumes of exhaust gases, emissions from enterprises envelop cities in a thick layer of smog, in which it sometimes becomes simply impossible to breathe. Hence, numerous health problems in adults and children. It is possible to clean the air from impurities through the reduction of road transport, the use of multistage purification systems at industrial enterprises, as well as through the widespread use of energy-saving technologies.
